ADVANCING SURGICAL CARE

# Innovation in surgical education conference and awards evening

7 June, London

Do you wonder about what the future has in store and the current innovations that are being used to transform surgical education?

We are bringing together key players from industry and academia to showcase innovation, demystify technology, discuss successes, and together, influence the direction of travel for surgical education.

Book today: [rcseng.ac.uk/ISE](https://rcseng.ac.uk/ISE)

If you are passionate about surgical education, teaching or leading a team to success, this is not a day you want to miss.

### **Programme highlights:**

- augmented reality session delivered by Microsoft
- horizon scanning panel
- haptics and simulation training: where do we go from here?
- practical breakout sessions with topics including: cognitive training, non-technical skills, and influencing the future.

CPD points will be awarded.

### **Awards evening:**

We are accepting team and individual awards nominations for innovation in surgical education by 1 May. Winners will be announced during the post-conference awards evening.

Abstracts for a poster competition are being accepted until 7 May.
