The training day has been well organised					X
Overall, the training has been effective				X	
The faculty have given useful support and feedback				X	
The catering & venue were of a high standard				X	
The material/models provided have been good				X	
Sufficient time has been given to complete each task				X	
The skills selected were at an appropriate level of difficulty				X	
I have become more confident in my laparoscopic skills				X	
I would recommend this training day to other trainees				X	

Do you have any comments?

Very useful day- faculty were excellent and very helpful

What suggestions do you have for the next ALSGBI training day?

More practice operations- maybe laparoscopic inguinal hernias?

The skills selected were at an appropriate level of difficulty				√	
I have become more confident in my laparoscopic skills				√	
I would recommend this training day to other trainees					√

Do you have any comments?

Was a well conducted programme, many thanks for giving up your Saturday and organizing this course for us. It definitely improved my skills.

What suggestions do you have for the next ALSGBI training day?

More time, less stations, more faculty like senior registrars at every station, providing constant feedback and improvement.

Do you have any comments?

It was really amazing to have a good face to face training day. The faculty was very supportive and the materials and models were excellent.

What suggestions do you have for the next ALSGBI training day?

More widespread publicity to trainees. The training day isn't well known about for the excellent forum that it is.

Do you have any comments?

Absolutely fantastic day with enthusiastic trainers and really great tips on laparoscopic operating skills. Highly recommend!

What suggestions do you have for the next ALSGBI training day?

More sessions, maybe run across two days if at all possible! Actual lap pass assessment stations to get certification perhaps?

Do you have any comments?

Thank you for a great training day

What suggestions do you have for the next ALSGBI training day?

-More information would be useful prior to doing the lap pass/lap appendectomy/lap chole stations to enable trainees to make the most of

these stations. It wasn't quite clear what the aim was of some stations. i.e. we could incorporate the roeder knots into the lap appendicectomy station by metronic.

Do you have any comments?

Overall a fantastic and useful day - really appreciate it. There was a discrepancy in skills in my group as my partner was more junior than me. This is a difficult thing to avoid but did mean I felt particularly rushed and time limited on the different skills.

What suggestions do you have for the next ALSGBI training day

Could we have access to pre-reading or videos so that these don't have to be watched on the day? E.g for lap fundoplication or anastomosis.

Do you have any comments?

An excellent training day using excellent equipment/models and run by enthusiastic faculty. Feedback was very helpful and has made a big difference to my confidence in laparoscopic suturing.

What suggestions do you have for the next ALSGBI training day?

Port placement and set up for procedure often make a big difference to how difficult the procedure can be. It would be helpful for each station to have a brief bit on port placement and tips and tricks for the procedure.
